

**USE OF RASAGILINE WITH OR WITHOUT
RILUZOLE TO TREAT AMYOTROPHIC LATERAL SCLEROSIS**

Abstract of the Invention

The subject invention provides a method for treating amyotrophic lateral sclerosis (ALS) in a subject in need of such treatment comprising administering to the subject R(+) -N-propargyl-1-aminoindan or a pharmaceutically acceptable salt thereof alone or in combination with 2-amino-6-trifluoromethoxy benzothiazole in amounts effective to treat ALS in the subject.
